ISER PUBLICATION SERIES

ISER has several publication series, with periodicals of varying length, on topics of broad public interest. If no charge is listed, single copies are free. Many are available on ISER’s Web site.

* Available on ISER Website: http://www.iser.uaa.alaska.edu/
“Can a Processing Plan Work in your Village?” Planning brochure, based on report by Gunnar Knapp and others. May 2001. Summarizes process for helping Alaska villages determine if establishing local processing plants would be feasible. 4 pages*

CLIENT REPORTS

These are reports prepared under contract for public and private organizations. Except as noted, all are available from ISER. The charges listed are just costs of copying; for reports ordered by mail, there is an additional postage charge. Many are available on ISER’s Web site.

University of Alaska Engineering Programs: A Community View. By Mary Killorin and Patricia DeRoche. Prepared for Mark Hamilton, President, University of Alaska; UA Statewide Academic Council (SAC); and Engineering Deans, UAA and UAF. May 2003. 40 pages.* $4.00.

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

Tax Cap 2000: Five Economic Studies. By Scott Goldsmith and Alexandra Hill. October 2000. Papers examining how a proposed cap on property taxes (which voters rejected) would have affected Alaska communities, governments, and economies. 72 pages. $7.20.*

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

ARTICLES, BOOK CHAPTERS, AND PAPERS

* Available on ISER Web site: [http://www.iser.uaa.alaska.edu/](http://www.iser.uaa.alaska.edu/)

* Available on ISER Web site: http://www.iser.uaa.alaska.edu/

*Still Missing After All These Years: Why the Scarcity of Subject-Matter Professional Development in Kentucky?* By G. Williamson McDiarmid. April 1999. Partnership for Kentucky Schools.

*Sustainability and Subsistence in Arctic Communities*. Paper presented by Matthew Berman at the Western Regional Science Association Meeting, Monterey, California. February 1998. 26 pages, $2.60.
ABOUT ISER

The Institute of Social and Economic Research (ISER) is part of the College of Business and Public Policy at the University of Alaska Anchorage. It has a core staff of about 30, including faculty members, research associates, and support personnel. Roughly one-third of its budget is from university money and two-thirds from grants and contracts. ISER staff members not only do research but also teach undergraduate and graduate courses.

ISER has studied Alaska since statehood, maintained a record of change, and examined issues as they developed. Among many other things, ISER has looked at the impacts of oil and other resource development; the fiscal policies of state and local governments; and the effects of change on Alaska’s Native peoples. In recent years, ISER has increasingly drawn communities, school districts, and universities—as well as Alaska Native and other private organizations—into research projects.

Public and private organizations routinely ask ISER’s staff to present research findings. Policymakers and private citizens alike use ISER research, and its findings are regularly reported in the press. ISER also maintains the state’s largest economic database and projects population and employment growth. It reports findings in publications that vary from two-page summaries to books and maintains a broad mailing list of government agencies, libraries, private companies, and individuals. All ISER’s research reports are available through ISER’s offices at 4550 Diplomacy Drive in Anchorage (near the main UAA campus), and ISER is continually adding to its Web site at www.iser.uaa.alaska.edu.

If you have questions, please call ISER at 907-786-5400, or send us an e-mail message at ayiser@uaa.alaska.edu.
